when it counts

S 205 Phantom

Top specialists only trust one type of sniper equipment – the best.

In the hands of a skilled marksman, the S205 Phantom, with its high-end scope optics, exceeds the expectations demanded of a rifle of this uniquely high quality.

In facilitating the fusion of sniper rifle and marksman, the Phantom creates a weapon of great effect, combining the reliability of experience, total concentration, and the knowledge of the precise moment to act in order to gain control in challenging situations.

Once the S205 Phantom has been adjusted to suit the shooter, it is unbeatable in terms of ergonomics and handling. The aluminium skeleton stock accommodates a multitude of special devices, like lasers or lamps, and allows the marksman to put the uncompromising precision of this high-end sniper to full use.

SSG 3000

The success of a police assignment is of paramount importance. In comparison, considerations concerning nasty weather or any other harsh conditions play a minimal role.

The SSG3000 excels with power, precision and easy handling in police and special task force applications worldwide, proving that it can handle any situation.

The SSG3000 optimizes precision and functionality. Key features of this premium sniper include a screw clamp connection for quick barrel exchange, an integrated rail slot for scope mounting, a sniper barrel with muzzle compensator, and a non-warping wood laminate stock with adjustable cheekpiece and cap. Equally useful is the silent, high-precision bolt guide, especially when using a sound-absorbing barrel.
